

# The latest from COPELAND INTERIORS

BY CLARE HINDLE

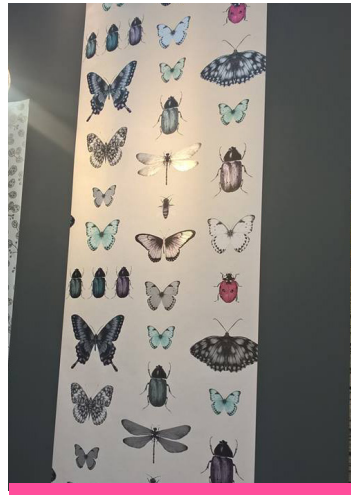

*Every September we have the all the seasonal launches coming out.*

*For four days Chelsea Harbour and Scion Park showcase new trends for companies including the likes of Colefax and Fowler, Style Library and Designers*

It is always a real treat to get out and to see what styles and trends are being shown for autumn/winter 2017/18.

Dramatic florals are defiantly back, mixing rich

colours like indigo with blush pink and burnished gold with dove grey. It all looks and feels totally decedent.

Still very much on show was the continuing love of bugs and butterflies, with many beautiful embroidered

cloths on show. Another trend to add to this is the delicately drawn feather designs seen by quite a few fabric houses in their collections.

Metallic is still very strong, bronze; burnished metals all look amazing combined in either a traditional or contemporary scheme.

Simple geometrics were used all over to compliment the softer flora and fauna patterns to give a strong tailored look.

All in all, it was a fairly eclectic mix and quite exciting to work with if your customer is that little bit daring!

## Latest News from us...

It's been very exciting for us here, as we have a love of William Morris. The next launch of the archives is 'volume 4' - this explores the love he had for collecting Persian rugs and fabrics and comprises of eight wallpapers and fabrics and five upholstery fabrics, perfect for many of the wonderful houses that we have across the Suffolk area.

If you are thinking of a refresh, have a little fun this autumn and give your furniture a new lease of life.

Or why not come and see us at the shop!

Clare
